TITLE 7—AGRICULTURE

Chapter I—Production and Marketing Administration (Standards, Inspection, Marketing Practices)

PART 51—FRUITS, VEGETABLES AND OTHER PRODUCTS (GRADING, CERTIFICATION AND STANDARDS)

UNITED STATES STANDARDS FOR ORANGES

On July 13, 1948, a notice of rule making was published in the FEDERAL REGISTER (F. R. Doc. 48-6197, 13 F. R. 3939, 4104) regarding proposed United States Standards for Oranges to supersede United States Standards for Citrus Fruits (12 F. R. 6277) currently in effect, insofar as such United States Standards for Citrus Fruits apply to oranges. After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice, the United States Standards for Oranges, hereinafter set forth, are hereby promulgated under the authority contained in the Department of Agriculture Appropriation Act, 1949 (Pub. Law 712, 80th Cong., approved June 19, 1948).

§ 51.192 *Oranges*—(a) *General*. (1) These standards apply only to the common or sweet orange group and varieties belonging to the Mandarin group, except tangerines. These standards do not apply to tangerines or to California and Arizona oranges for which separate U. S. Standards are issued. The U. S. Combination and the U. S. Combination Russet grades do not apply to Florida oranges.

(2) The tolerances for the standards are on a container basis. However, in-

dividual packages in any lot may vary from the specified tolerances as stated below, provided the averages for the entire lot, based on sample inspection, are within the tolerances specified.

(3) For packages which contain more than 10 pounds and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(4) For packages which contain 10 pounds or less, individual packages in any lot are not restricted as to the percentage of defects except that not more than one fruit which is decayed or very seriously damaged shall be allowed in any package.

(b) *Grades*—(1) *U. S. Fancy*. U. S. Fancy shall consist of oranges of similar varietal characteristics which are well colored, firm, well formed, mature, and of smooth texture; free from ammoniation, bird pecks, bruises, buckskin, creasing, cuts which are not healed, decay, growth cracks, scab, split navels, sprayburn, and undeveloped or sunken segments, from injury by green spots or oil spots, pitting, rough and excessively wide or protruding navels, scale, scars, thorn scratches, and from damage caused by dirt or other foreign materials, dryness or mushy condition, sprouting, sunburn, rindiness or woodiness of the flesh, disease, insects, or mechanical or other means.

(i) In this grade not more than one-tenth of the surface, in the aggregate, may be affected with discoloration.

(ii) See tolerances for defects.

DIAMETER IN INCHES

Pack	Minimum	Maximum
90's.....	3 3/4	3 1/2
125's.....	3 1/2	3 1/2

in any container are similar in color and shape.

(2) "Well colored" means that the fruit is yellow or orange in color with practically no trace of green color.

(3) "Firm" as applied to common oranges, means that the fruit is not soft, or noticeably wilted or flabby as applied to oranges of the Mandarin Group (Satsumas, King, Mandarin), means that the fruit is not extremely puffy, although the skin may be slightly loose.

(5) "Smooth texture" means that the skin is thin and smooth for the variety and size of the fruit.

(6) "Injury" means any defect or blemish which more than slightly affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as injury:

(i) Green spots or oil spots, when appreciably affecting the appearance of the individual fruit.

(ii) Rough and excessively wide or protruding navels, when protruding beyond the general contour of the orange; or when flush with the general contour but with the opening so wide, considering the size of the fruit, and the navel growth so folded and ridged that it detracts noticeably from the appearance of the orange.

(iv) Scars which are depressed, not smooth, or which detract from the appearance of the fruit to a greater extent than the maximum amount of discoloration allowed in the grade.

(v) Thorn scratches, when the injury is not slight, not well healed, or more unsightly than discoloration allowed in the grade.

(7) "Discoloration" means russetting of a light shade of golden brown caused by rust mite or other means. Lighter shades of discoloration caused by superficial scars or other means may be allowed on a greater area, or darker shades may be allowed on a lesser area, provided no discoloration caused by melanose or other means may affect the appearance of the fruit to a greater extent than the shade and amount of discoloration allowed for the grade.

(8) "Fairly smooth texture" means that the skin is fairly thin and not coarse for the variety and size of the fruit.

(9) "Damage" means any defect or injury which materially affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(i) Ammoniation, when not occurring as light speck type similar to melanose.

(ii) Creasing, when causing the skin to be materially weakened.

(iii) Dryness or mushy condition, when affecting all segments of common oranges more than one-fourth inch at the stem end, or all segments of varieties of the Mandarin Group more than one-eighth inch at the stem end, or more than the equivalent of these respective amounts, by volume, when occurring in other portions of the fruit.

(iv) Green spots or oil spots, when materially affecting the appearance of the individual fruit.

(v) Scab, when it cannot be classed as discoloration, or appreciably affects shape or texture.

(vi) Scale, when it materially affects the appearance of the fruit.

(vii) Scars which are deep.

(viii) Scars which are shallow or fairly shallow and detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade.

(ix) Scars which are not smooth.

(x) Split or rough or protruding navels, when any split is unhealed, or more than three well-healed splits at the navel, or any split which is more than one-fourth inch in length, or three-cornered, star-shaped, or other irregular navels when the opening is so wide, considering the size of the orange, and the navel growth so folded and ridged that it detracts materially from the appearance of the orange; or navels which flare, bulge or protrude beyond the general contour of the orange to the extent that they are subject to mechanical injury in the process of proper grading, or handling, or packing.

(xi) Sunburn, when the area affected exceeds 25 percent of the fruit surface, or when the skin is appreciably flattened, dry, darkened, or hard.

(xii) Thorn scratches, when the injury is not well healed, or concentrated light colored thorn injury which has caused an area of more than an average of one-fourth inch in diameter of the skin to become hard, or slight scratches when light colored and concentrated and averaging more than 1 inch in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above.

(xiii) Richness or woodiness, when the flesh of the fruit is so ricey or woody that excessive pressure by hand is required to extract the juice.

(10) "Fairly well colored" means that except for one inch in the aggregate of green color, the yellow or orange color predominates over the green color on that part of the fruit which is not discolored.

(11) "Reasonably well colored" means that the yellow or orange color predominates over the green color on at least two-thirds of the fruit surface, in the aggregate, which is not discolored.

(12) "Fairly firm" as applied to common oranges, means that the fruit may be slightly soft, but not bruised; as applied to oranges of the Mandarin Group (Satsumas, King, Mandarin) means that the skin of the fruit is not extremely puffy or extremely loose.

istic of the variety but is not appreciably elongated or pointed, or otherwise deformed.

(14) "Slightly rough texture" means that the skin is not of smooth texture but is not materially ridged, grooved, or wrinkled.

(15) "Serious damage" means any defect or injury which seriously affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as serious damage:

(i) Ammoniation, when scars are cracked, or when dark and aggregating more than three-fourths inch in diameter or when light colored and aggregating more than 1¼ inches in diameter.

(ii) Buckskin, when aggregating more than 25 percent of the fruit surface or the fruit texture is seriously affected.

(iii) Creasing, when so deep or extensive that the skin is seriously weakened.

(iv) Dryness or mushy condition, when affecting all segments of common oranges more than one-half inch at the stem end, or all segments of varieties of the Mandarin Group more than one-fourth inch at the stem end, or more than the equivalent of these respective amounts, by volume, when occurring in other portions of the fruit.

(v) Green spots or oil spots, when seriously affecting the appearance of the individual fruit.

(vi) Scab, when it cannot be classed as discoloration, or when materially affecting shape or texture.

(vii) Scale, when it seriously affects the appearance of the individual fruit.

(viii) Scars which are very deep.

(ix) Scars which are not very deep but which detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade.

(x) Scars which are not fairly smooth.

(xi) Split or rough or protruding navels, when any split is unhealed, or one well healed split at each corner of irregular navels when any one is more than one-half inch in length, or when aggregating more than 1 inch in length, or when more than four in number; or navels which protrude beyond the general contour of the orange to the extent that they are subject to mechanical injury during the process of proper grading, or handling, or packing; or irregular navels when the opening is so wide, considering the size of the orange, and the navel growth so badly folded and ridged that it detracts seriously from the appearance of the orange.

(xii) Sprayburn which seriously affects the appearance of the fruit or is hard, or when more than 1¼ inches in diameter in the aggregate has a light brown discoloration.

(xiii) Sunburn, which affects more than one-third of the fruit surface, or is hard, or the fruit is decidedly one-sided, or when more than 1¼ inches in diameter in the aggregate has a light brown discoloration.

(xiv) Thorn scratches, when the injury is not well healed, or concentrated

light colored thorn injury which has caused an area of more than an average of one-half inch in diameter of the skin to become hard, or slight scratches when light colored and concentrated, averaging more than 1½ inches in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above.

(xv) Undeveloped or sunken segments, in navel oranges, when such segments are so sunken or undeveloped that they are readily noticeable.

(xvi) Riciness or woodiness, when the flesh of the fruit is so ricey or woody that excessive pressure by hand is required to extract the juice.

(16) "Misshapen" means that the fruit is decidedly elongated, pointed or flat-sided.

(17) "Slightly spongy" means that the fruit is puffy or slightly wilted but not flabby.

(18) "Very serious damage" means any defect or injury which very seriously affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as very serious damage:

(i) Growth cracks that are seriously weakened, gummy or not healed.

(ii) Ammoniation, when aggregating more than 2 inches in diameter, or which has caused serious cracks.

(v) Buckskin, when rough and aggregating more than 50 percent of the surface of the fruit.

(vi) Creasing, when so deep or extensive that the skin is very seriously weakened.

(vii) Dryness or mushy condition, when affecting all segments of common oranges more than one-half inch at the stem end, or all segments of varieties of the Mandarin Group more than one-fourth inch at the stem end, or more than the equivalent of these respective amounts, by volume, when occurring in other portions of the fruit.

(viii) Scab, when aggregating more than 25 percent of the surface of the fruit.

(ix) Scale, when covering more than 20 percent of the surface of the fruit.

(x) Split navels, when not healed or the fruit is seriously weakened.

(xi) Sprayburn, when seriously affecting more than one-third of the fruit surface.

(xii) Sunburn, when seriously affecting more than one-third of the fruit surface.

(xiii) Thorn punctures, when not healed or the fruit is seriously weakened.

(xiv) Riciness or woodiness, when the flesh of the fruit is so ricey or woody that excessive pressure by hand is required to extract the juice.

(g) *Standards for internal quality of common sweet oranges (Citrus Sinensis (L) Osbeck)*—(1) *U. S. Grade AA Juice (Double A)* Any lot of oranges, the

juice content of which meets the following requirements, may be designated "U. S. Grade AA Juice (Double A)"

(i) Each lot of fruit shall contain an average of not less than 5 gallons of juice per standard packed box of one and three-fifths bushels.

(ii) The average juice content for any lot of fruit shall have not less than 10 percent total soluble solids, and not less than one-half of 1 percent anhydrous citric acid, or more than the maximum acid specified in Table I of this section.

(2) *U. S. Grade A Juice.* Any lot of oranges, the juice content of which meets the following requirements, may be designated "U. S. Grade A Juice"

(i) Each lot of fruit shall contain an average of not less than four and one-half gallons of juice per standard packed box of one and three-fifths bushels.

(ii) The average juice content for any lot of fruit shall have not less than 9 percent total soluble solids, and not less than one-half of 1 percent anhydrous citric acid, or more than the maximum acid specified in Table I of this section.

(3) *Maximum anhydrous citric acid permissible for corresponding total soluble solids.* For determining the grade of juice, the maximum permissible anhydrous citric acid content in relation to corresponding total soluble solids in the fruit is set forth in the following table together with the minimum ratio of total soluble solids to anhydrous citric acid:

(4) *Method of juice extraction.* The juice used in the determination of solids, acid, and juice content shall be extracted from representative samples as thoroughly as possible with a reamer, or by hand, and shall be strained through a double thickness of gauze having 44 x 40 threads per square inch, and shall not be extracted or strained in any other manner.

(h) *Effective time and supersedure.* The United States Standards for Oranges contained in this section and which supersede the United States Standards for Citrus Fruits (12 F. R. 6277) insofar as such standards for citrus fruits apply to oranges shall become effective on September 14, 1948.

It is hereby found that it is impractical, unnecessary, and contrary to the public interest to postpone the effective date of these standards until 30 days after publication hereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1946 ed. 1001 et seq.) because the packing of oranges will commence in September, and it is in the public interest that the standards be in effect at the commencement of the packing season; and a reasonable time is permitted, under the circumstances, for preparation for such effective date (Pub. Law 712, 80th Cong., approved June 19, 1948.)

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders)

[Lemon Reg. 289 Amdt. 1]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR, Cum. Supp., 953.1 et seq., 13 F. R. 766), regulating the handling of lemons grown in the State of California or in the State of

Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rule-making procedure (60 Stat. 237; 5 U. S. C. 1001 et seq.) in that the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient and this amendment relieves restrictions on the handling of lemons grown in the State of California or in the State of Arizona.

Order as amended. The provisions in subparagraph (b) (1) of § 953.396 (Lemon Regulation 289, 13 F. R. 5019) are hereby amended to read as follows:

(1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., August 29, 1948, and ending at 12:01 a. m., P. s. t., September 5, 1948, is hereby fixed as follows:

- (i) District 1: 400 carloads.
- (ii) District 2: Unlimited movement.

- (i) District 1: 325 Carloads;
- (ii) District 2: Unlimited Movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached to Lemon Regulation 289, (13 F. R. 5019) and made a part hereof by this reference.

(3) As used in this section, "handler," "handler," "carloads," "prorate base," "District 1," and "District 2" shall have the same meaning as is given to each such term in the said amended marketing agreement and order. (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.)

TITLE 12—BANKS AND BANKING

Chapter II—Federal Reserve System

Subchapter A—Board of Governors of the Federal Reserve System

PART 206—TRUST POWERS OF NATIONAL BANKS

LIMITATIONS ON PARTICIPATION IN COMMON TRUST FUNDS

The following interpretation under this part was issued by the Board of Governors of the Federal Reserve System on August 27, 1948.

§ 206.104 *Limitations on participation in common trust funds.* Section 206.17 (c) (5), dealing with limitations upon investments in common trust funds, provides in part as follows:

No funds of any trust shall be invested in a participation in a Common Trust Fund if such investment would result in such trust having invested in the aggregate in the Common Trust Fund an amount in excess of 10 per cent of the value of the assets of the Common Trust Fund at the time of investment, as determined by the trust investment committee, or the sum of \$50,000, whichever is less. * * * In ap-

plying the limitations contained in this paragraph, if two or more trusts are created by the same settlor or settlors and as much as one-half of the income or principal or both of each trust is payable or applicable to the use of the same person or persons, such trusts shall be considered as one.

The Board of Governors has considered an inquiry with respect to the application of the above-quoted provisions of the part in the following situation:

Two trusts are created by the same settlor. The first trust is for her benefit for life, then for the benefit of the life of a second party with remainder over to a third party. The second trust is for the life benefit of the second party with remainder over to a third party. The beneficial interest might merge for a time for the remaining period of the life of the second party if he should survive the settlor, and then upon the second party's death there would be an ultimate merger upon vesting of the principal of both trusts in the third party.

The Board pointed out that this situation was very similar to the one considered in a ruling published in the 1941 Federal Reserve Bulletin at page 618, the only difference being in the possible merger of the beneficial interests for a time in one of the two life tenants before ultimate merger upon vesting of the principal of both trusts in the remainderman. The Board concluded that this situation came within the scope of the 1941 ruling and that investments in a common trust fund might be made without considering the two trusts as one for the purpose of applying the limitations of § 206.17 (c) (5) quoted above.

The Board also stated that the merger of the beneficial interests through vesting thereof in one person at some future date would not necessitate at such time withdrawal or reduction of the participation by either trust in the common trust fund, as § 206.17 (c) (5) is intended to deal only with the act of investing in participations in common trust funds and does not require the withdrawal or reduction of participations once legally acquired. PROPOSED RULE MAKING

FEDERAL COMMUNICATIONS COMMISSION

147 CFR, Part 31

[Docket Nos. 8736, 8975]

ANNOUNCEMENT OF CONFERENCE ON SEPTEMBER 13, 1948, WITH INDUSTRY REGARDING FUTURE PROCEDURES PERTAINING TO TELEVISION BROADCAST ALLOCATIONS

In the matter of amendment of § 3.606 of the Commission's rules and regulations; Docket No. 8975; Docket No. 8736.

1. On May 5, 1948, the Commission adopted an order which provided for a rule making proceeding to commence on June 14, 1948 for making changes and additions to its allocation plan set forth in § 3.606 of its rules and regulations. The Commission's proposed changes were based on the "Standards of Good Engineering Practice Concerning Television Broadcast Stations," adopted on December 19, 1945, which are currently in effect.

2. During the hearing the Commission received testimony regarding the effects of tropospheric interference on present and proposed allocations. The present standards do not include specific data on tropospheric propagation. For the past several years the Commission has been conducting measurements of tropospheric signals in the FM and television frequency ranges, looking toward the preparation of propagation curves and

their inclusion in the FM and television engineering standards. Because of the claims during the television allocation hearings of serious effects of tropospheric interference on present and proposed television allocations, which are in general supported by studies made by the Commission's Bureau of Engineering, the Commission is considering the question of revising its television allocation standards to incorporate the effects of tropospheric propagation. A collateral problem is the basis and extent to which the proposed allocations should utilize directional antennas. Also there were other suggestions made which should receive consideration, i. e., whether present power and antenna height restrictions should be changed and whether protected contours should be revised.

3. The Commission desires to base the national television allocation plan on the best available engineering information. This will first require a consideration of questions regarding the desirability of revising the present Rules and Standards pertaining to the technical phases of television allocations. Since achievement of the most rapid development of television consistent with the soundest engineering foundation must depend on the fullest cooperation between the Commission and the television industry in facing and solving the important problems which may be presented, the Commission is calling a conference with interested parties on September 13, 1948, at 10:00 a. m., in Room 6121, New Post

Office Building, Washington, D. C., to consider the following matters:

1. Whether the Commission should initiate proceedings to revise the television allocation rules and standards prior to final decision in Dockets 8975 and 8736.

2. If the standards are to be revised, what policy should be adopted with respect to applications now pending before the Commission.

3. What procedures should be adopted in order that the revised standards can be based on the best available engineering information.

4. It is emphasized that the purpose of this conference is to discuss substantial questions which may be presented by the record concerning the adequacy of existing rules and standards to achieve the soundest allocation plan, and not to discuss engineering details or suggestions in relation to such questions. Briefs, memoranda or statements embodying information or proposals for consideration at the conference may be submitted before or at the time of the conference. To facilitate preparation of an agenda and an order of presentation for the conference, parties who intend to participate should notify the Commission by September 5, 1948.

FEDERAL COMMUNICATIONS COMMISSION,

Secretary.

FEDERAL POWER COMMISSION

[Docket No. G-1086]

TEXAS GAS TRANSMISSION CORP.

NOTICE OF APPLICATION

AUGUST 31, 1948.

Notice is hereby given that on July 19, 1948, an application was filed with the Federal Power Commission by Texas Gas Transmission Corporation (Applicant), a Delaware corporation with its principal places of business at Owensboro, Kentucky, and Memphis, Tennessee, for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, as amended, authorizing the construction and operation of facilities hereinafter described and more particularly set forth in the application on file with the Commission and open to public inspection:

Approximately 7½ miles of 8½-inch Q. D. lateral pipeline from a point on the pipeline system operated by Texas Eastern Transmission Corporation in closest

proximity to the Horseshoe area system of Indiana Gas and Water Company, near Mitchell, Indiana, and extending from that point to the nearest connection with the distribution system operated by Indiana Gas and Water Company, which proposed pipeline would be used for the sale of natural gas by Applicant to the said Indiana company.

The application also requests an order from the Commission pursuant to section 7 (a) of the Natural Gas Act, as amended, directing Texas Eastern Transmission Corporation to sell approximately 5000 Mcf of natural gas per day to Applicant and deliver that quantity of natural gas through Applicant's existing connection with Texas Eastern at Seymour, Indiana, and also through the lateral pipeline proposed to be constructed in accordance with the design of this pending application. This portion of the application requesting authority pursuant to section 7 (a) of the Natural Gas Act was, by order of the Commission dated July 28, 1948, set for hearing and consolidated with the proceedings then pending involving Texas Eastern Transmission Corporation in Docket No. G-1003.

Applicant, in requesting authority to construct the aforesaid lateral pipeline in accordance with the provisions of section 7 (c) of the Natural Gas Act, as amended, states that the proposed connection is needed in order adequately to supply the needs of the Horseshoe area served by Indiana Gas and Water Company, which area embraces the towns of Greencastle, Martinsville, Bloomington, Bedford, Franklin, Columbus, Seymour and Shelbyville in Indiana. Applicant further states that the needs of this area have rapidly increased during the past few years and, in addition, present requirements of industries whose products affect the national economy and defense will utilize increasing amounts of gas during the coming 1948-1949 winter season. Applicant states that during the past 1947-1948 winter season, despite allocations made of the quantities of gas delivered by Panhandle Eastern Pipe Line Company as a main supplier of natural gas to Applicant, that it could not deliver to Indiana Gas and Water Company the quantities of gas needed in the so-called Horseshoe area of that distribution system.

Applicant states that the need for the designated quantity of gas will extend for a period of approximately one year, after which Applicant contemplates that the construction of the facilities proposed by it in the application filed as Docket No. G-859 will have been completed and through such facilities Applicant will then be able to supply the growing needs of Indiana Gas and Water Company.

The estimated total over-all capital cost of the construction of the proposed facilities is \$124,367, which will be financed with funds on hand.

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of § 1.37 of the Commis-

sion's rules of practice and procedure and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with reasons for such a request.

The application of Texas Gas Transmission Corporation is on file with the Commission and open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. C., not later than 15 days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of §§ 1.8 or 1.10, whichever is applicable, of the rules of practice and procedure.
